REINAEL YABUT

+63 939 943 1580 | reinaelyabut.work@gmail.com | linkedin.com/in/reinaelyabut | github.com/yabswannalearn
www.reinaelyabut.dev

Technical Skills

Full-Stack Development: Python, JavaScript, TypeScript, React, Next.js, Node.js, FastAPI, Django, Flask, PostgreSQL, Supabase, pgvector, TailwindCSS
Automation & AI: n8n, Zapier, LLM Engineering, Agentic AI, Prompt Engineering, RAG Pipelines, LangChain, GoHighLevel, Airtable, Make
Tools & Data: Docker, Git, Playwright, SQL, Power BI, Google Colab, Data Validation, Raspberry Pi, CI/CD, Claude, Codex

Education

Holy Angel University
Angeles City, Philippines
Bachelor of Science in Computer Engineering — Dean's Lister, President's Lister, Best Software Design

Certifications

Data Engineering Associate | Azure AI Fundamentals (AI-900) | Machine Learning Fundamentals | Data Analyst Associate | AI Fundamentals | SQL (Advanced) | Lean Six Sigma Yellow Belt

Summary

Full Stack AI Engineer with experience building end-to-end applications and AI-driven automation systems. Comfortable across the stack, from React/Next.js frontends and FastAPI/Django/Flask backends to n8n workflows and LLM integrations. Proven track record designing scalable data pipelines, unified analytics dashboards, and agentic AI systems, and translating business requirements into production-ready tools.

Experience

Freelance & Consulting — Remote
Full Stack & AI Automation Engineer — Feb 2026 - Present

- Delivered production web apps and AI automations for SMB and enterprise clients across the US, Canada, Australia, and Thailand.
- Automated an end-to-end logistics pipeline in Python (order intake, delivery dispatch, driver paperwork, and billing reconciliation), saving approximately $1,000/week in operational overhead.
- Developed full-stack web and mobile budget tracking applications with real-time sync. Stack: Next.js, React Native, PostgreSQL.
- Engineered automated QA pipelines and SEO content engines using n8n, OpenAI, and LangChain to eliminate manual regression checks.

Parallaxx — Auckland, New Zealand (Remote)
AI Developer Intern — Dec 2025 - Feb 2026

- Built an AI Agent market intelligence pipeline using Python, FastAPI, and the Gemini API. Cut reporting time from 3-5 days to under 30 seconds.
- Built an autonomous AI agent workflow in n8n. Drove internal adoption by making the tool easy to use for operations staff.
- Engineered a 1.5TB data migration script and automated validation checks, collaborating directly with the New Zealand client team.

Silicon Barracks — Central Luzon, Philippines (Remote)
AI Developer (Freelance) — Jun 2022 - Nov 2024

- Designed and optimized prompt engineering pipelines for large language models to improve output accuracy and reduce token latency.
- Fine-tuned open-source models on domain-specific datasets and implemented RAG (Retrieval-Augmented Generation) systems for client applications.
- Evaluated model performance, validated raw SQL datasets, and maintained 100% data integrity across all client deliverables.

Projects

Jimojim: Workout Split & Progress Tracker | *Next.js, TypeScript, TailwindCSS, Supabase, Zustand* **2026**

- Architected a full-stack workout tracking platform with dynamic PPL + Core split builders, live set loggers, and a drag-and-drop plan editor.
- Integrated real-time exercise progress analytics and responsive volume tracking charts with Recharts, backed by Supabase for instant data sync.

CV Tailor | *Next.js, FastAPI, Go, PostgreSQL, Gemini API, LaTeX* **2026**

- Built a full-stack career platform end to end with Next.js frontend, FastAPI backend, Go microservices, and PostgreSQL database.
- Implemented AI resume tailoring, job tracking, and AI interview practice using the Gemini API and MediaPipe delivery metrics.

PXX Spark Autonomous Agent | *n8n, Docker, RLHF, Context Prompting, PostgreSQL* **2025 - 2026**

- Built an autonomous AI agent using n8n and RLHF to automate operational tasks, achieving 100% operational uptime via proactive monitoring.
- Cut market research turnaround from a full week to minutes by automating data collection and analysis end to end.

O'Key-Ask AI Assessment Platform | *React, NodeJS, Gemini, OCR, RAG, GCP, NLP, PostgreSQL* **2025 - 2026**

- Developed a full-stack AI assessment kiosk aligned with DepEd and CHED standards, cutting assessment cycles by 97.78 percent.
- Consolidated grading metrics into a unified dashboard, integrating LLMs for automated test generation and OCR-based grading.
